

# PARROT CK3000 EVOLUTION

## Bluetooth® hands-free car kit

The Parrot CK3000 EVOLUTION is the favourite (or choice) *Bluetooth* hands-free solution for users looking for discretion above all else. Make and receive calls in complete safety while travelling in the car using the built-in voice recognition feature. You keep your hands on the wheel at all times. When you receive a call, the music on the car stereo automatically mutes and the sound of your conversations is streamed through the vehicle's speakers. In-car calls have never been so simple.

## Advanced features

- USER INTERFACE :** Simple and practical, the keypad of the Parrot CK3000 EVOLUTION allows for easy access to all the kit's functions.
- BUILT-IN VOICE RECOGNITION :** The voice recognition feature is built into the kit to guarantee maximum safety at the wheel.
- SEAMLESS INTEGRATION :** In addition to its highly discreet interface, the kit is connected directly to the vehicle's speakers.

## Connections

Bluetooth v1.2

## Product key points

- WIRELESS :** *Bluetooth* hands-free kit
- QUALITY :** High-fidelity sound over the vehicle's speakers, noise reduction and echo cancellation
- DISCREET :** Fits seamlessly inside the vehicle

## Parrot key points

- SAFETY :** Voice recognition up to 150 names and voice menus
- UNIVERSAL :** Compatible with all *Bluetooth* mobile phone brands
- COMPATIBLE :** Software updates by *Bluetooth*

## Bluetooth wireless technology

The *Bluetooth* wireless technology enables voice and data to be sent via a short-distance radio link. It connects a wide range of electronic equipment without requiring additional cables. Furthermore, it extends the communication possibilities for mobile phones and a large number of devices. The *Bluetooth* Stereo profile (A2DP) uses the same radio frequencies and allows the sending of music files from one device to another. As Parrot products are 100% *Bluetooth* compatible, they are compatible with almost every *Bluetooth* stereo mobile phone (A2DP). Refer to [www.parrot.com](http://www.parrot.com) to know if your mobile phone is compatible.
