

PARROT MKi9000

Leading-edge *Bluetooth* hands-free systems

The Parrot MKi9000 is a *Bluetooth* hands-free system that blends in seamlessly inside any vehicle. A wireless remote control that can be positioned on the steering wheel or dashboard and provides control over all the functions of the MKi9000. In addition to delivering high telephony performance, the MKi9000 is also gifted for music with an iPod®/iPhone™ connector, USB port, *Bluetooth* Stereo receiver and line-in input. The system comes with a double external microphone for top-quality conversations. The Parrot MKi9000 is a *Bluetooth* hands-free system compatible with all vehicle makes and which works with all mobile phone brands.

iPod/USB AND LINE-IN CONNECTIONS:

PHONEBOOK SYNCHRONISATION:

AUTOMATIC VOICE RECOGNITION:

WIRELESS REMOTE CONTROL:

BLUETOOTH HANDS-FREE SYSTEM:

Connect all your audio devices to the Parrot MKi9000.

The system automatically synchronises its phonebook with the contacts on your mobile phone. The auto learning voice recognition feature is built in to guarantee maximum safety at the wheel.

The MKi9000 comes with an RF wireless remote control that can be positioned on your car's steering wheel or dashboard.

Make and receive calls with the Parrot MKi9000 without ever taking your hands off the wheel.

Bluetooth wireless technology

The *Bluetooth* wireless technology enables voice and data to be sent via a short-distance radio link. It connects a wide range of electronic equipment without requiring additional cables. Furthermore, it extends the communication possibilities for mobile phones and a large number of devices. The *Bluetooth* stereo (A2DP) profile uses the same radio frequencies and can be used to send music tracks from one device to another. Parrot products are 100% *Bluetooth* compatible and are therefore compatible with almost every *Bluetooth* stereo (A2DP) mobile phone.

Visit www.parrot.com to find out whether your phone is compatible.
